

TECHNICAL DATA SHEET

GASPROOF for bubble test

DESIGNATION ASTM E 515-95 BUBBLE TEST

GASPROOF is a high tech product, delivered both in spray cans ready for use and as concentrated paste in 1 kg plastic container to be diluted with water before use at dilution ratio of 1 to 200 'till 1: 400.

Gasproof is made of pure synthetic surface active agents without oil, fat, fat acids and all soap solids. Because of this GASPROOF is not inflammable, not toxic and suitable for all technical gases for pneumatic test and for the use in oxygen installations.

GASPROOF can be used in high-, middle- and low-pressure range. It is suitable for all gas- and pneumatic-installations, for machinery as well as tank constructions..
